RADA S.PA 1 SHOWER PANEL
RADA FLIGHT SHOWER TRAY

A modern changing room in a busy gym is a demanding environment for washroom controls. Gym owners have to be confident in the durability and reliability of the products specified while ensuring they meet critical safety requirements.

PureGym understands this and when it embarked on the refurbishment of a number of its branches across the country it turned to Rada to deliver a safe, robust and hygienic shower system.

With the installation of Rada's S.PA 1 Shower Panel and Flight Shower Tray, PureGym was confident that the products specified are manufactured from high quality and durable materials and able to withstand the rigorous demands of a facility that is open 24 hours a day, 365 days a year.

As the Facilities Management team, PureGym, comments: "We offer our members round the clock access to our gyms ensuring their workout can easily fit into their daily routine – whatever time that may be. With the installation of Rada's products we have the confidence our shower facilities are robust while at the same time providing a safe and aesthetically pleasing space for our members."

Rada's S.PA 1 Shower Panel is manufactured from a stain resistant acrylic capped-resin stone with the slimline Flight Shower Tray featuring a tri-laminate acrylic-capped resin stone casing. This ensures both products are durable and scratch and chip resistant while also being

resistant to water staining – essential features in a busy gym changing room.

Due to the risk of bacterial growth in stagnant water within water systems, most infection control regimes in public buildings require flushing of all outlets on a regular basis. Rada's S.PA 1 Shower Panel can be pre-programmed to undertake duty flushing at required intervals and durations, dependent on the facility's requirements. The ability to pre-programme duty flushing provides the assurance that this important hygiene discipline happens automatically while from a resource perspective, creates significant time and cost efficiencies.

Rada – A Kohler Company

Rada's Flight Shower Tray is an anti-slip shower tray that makes showering safer and more hygienic. **As the Facilities Management team, PureGym, comments:** "The welfare of our members is at the centre of everything we do, and as such, we have to be confident that the products we install in our gyms not only support our robust hygiene control measures but are safe for all our members.

Rada's Flight Shower Tray benefits from anti-slip technology significantly reducing the potential of slips and trips. Additionally, we no longer need to use anti-slip matting which can often be a breeding ground for bacteria, making the shower system more hygienic."

Alongside this, Rada's Flight Shower Tray features the innovative BioCote® technology. The addition of the BioCote® antimicrobial additive in the manufacturing process results in the Flight Shower Tray benefitting from an antimicrobial coating that significantly reduces bacteria and mould growth by up to 99.9%.

Importantly Rada's S.PA 1 Shower Panel and Flight Shower Tray provide PureGym with the confidence that the products specified put safety at the heart – ensuring its members can enjoy their gym experience in a safe and welcoming environment.

Rada is driven to design water flow controls and washroom products that promote safety and sustainability and to solve problems in a way that makes a fundamental difference to people's lives.

It believes people should be safe and secure, using taps and showers designed to prevent injury and waterborne infection while conserving resources. It's at the heart of everything it does.
