GETTING THE MOST FROM YOUR SELECTOR

A STEP-BY-STEP GUIDE TO THE RADA PRODUCT RANGE

Our intuitive guide is designed to aid the selection of appropriate washroom controls. Grouped by application and colour-coded for ease of use, each product is presented with relevant information, best practice applications, key features and benefits, approvals and plumbing schematics when relevant.

Digital Washroom Controls	Individual Showering	Group Showering
Hand Washing	Electronic Washroom Controls	Bathing
Shower Fittings	Emergency Showering	Accessories

PRODUCT GUIDE INCLUDES

- **Product Description and Features**
- **Complementary products**
Where applicable typical options are identified - but the list is not exhaustive
- **Dimensions** (mm)
- **Installation Schematics**
Showing typical plumbing installations
- **Web Link**
Web links are provided where further information can be downloaded

RADA DIGITAL WASHROOM CONTROLS

Rada has pioneered washroom and water flow control solutions since launching the very first thermostatic mixing valve in the 1930s.

Today the company offers a new world of intelligent control based on the very latest digital technology and this makes many advanced features possible such as non-touch activation and temperature adjustment, plus the ability to specify a fixed blended temperature.

Thermal disinfection and automatic duty flushing which assist in the control of Legionella bacteria also help ensure the highest standards of washroom hygiene. These digital solutions are for handwashing, showering, bathing or bidet use and offer an alternative to mechanical blending shown in other sections.

PRODUCT DESCRIPTION

Concealed digital mixing valve for healthcare washbasins, offering non-touch control, programmable maximum, minimum and default temperatures, duty flush and thermal disinfection with temperature logging and data logging capabilities.

- Buildcert TMV3 Scheme Approved
- Non-touch ON/OFF spout activation or timed flow control and temperature adjustment
- Programmable flow times and temperatures, 3 optional pre-programmed modes
- Programmable 'duty flushing'; secure thermal disinfection with datalogging
- Valve access behind interface – no need to remove panel
- No surface temperature risks
- Easy to clean
- Connections: 15mm compression/ flat faced union

Rada Outlook Outlet By-Pass Adaptor	147
Rada Outlook RS485 Socket	147
Rada Relay Box	98
Rada Isolating Key Switch	96

PRODUCT DESCRIPTION

Concealed digital thermostatic mixing valve and sensor box for hand washing and/or showering, offering programmable maximum, minimum and default temperatures, duty flush and supervised thermal disinfection with data-logging capabilities. Supplied complete with power supply, check valves and strainers.

- Cost effectively and flexibly manage your water systems whilst complying with legislative requirements
- Rada Outlook is a six outlet digital thermostatic mixing valve, with programmable timed flow for hand washing and showering applications by touch or non-touch sensors, or non-touch spouts
- Automatically performs duty flush at intervals specific for your installation
- Records automatic duty flush and supervised thermal disinfection data for legislative compliance
- Easily program Rada Outlook using Windows based configuration tool, for easy access and download of data
- Integrate auxiliary products such as a fan, pump or PIR occupancy sensor to Outlook system and program specifically to your own application
- Connect multiple Rada Outlook units together to a Building Management System (up to 31 on each MODBUS network)

RADA INDIVIDUAL SHOWERING

Rada's practical and flexible thermostatic mixing valve range offers exposed and built-in options to suit many different applications.

Single sequential or dual control lever versions are available and can be paired with various fixed showerheads or adjustable kits to create bespoke solutions that satisfy individual requirements. Pre-plumbed ready-to-connect shower panels can also be supplied. These feature such options as fixed or adjustable temperature, mechanical or electronic timed flow control, vandal resistant showerheads and flexible hose and slide rail combinations. Many also include TMV3-approved valves, making them especially well-suited to use by the young, elderly or infirm.

PRODUCT DESCRIPTION

½" built-in single sequential thermostatic mixing valve. Supplied complete with integral strainers.

- Buildcert TMV3 Scheme Approved
- Buildcert TMV2 Scheme Approved
- Single sequential control for ease of use
- Recessed for use with concealed pipe work
- High flow rates at low pressure
- Connections: (Inlets) 15mm compression.
(Outlet) Reversible outlet connector: ½" BSP male or 15mm compression

DIMENSIONS (mm)

RADA GROUP SHOWERING

Included in Rada's highly effective group showering solutions are thermostatic mixing valves with 15mm, 22mm and 28mm outlets that enable perfect temperature blending.

These can be combined with Rada's stylish and vandal-resistant showerheads, plus push-button mechanical timed flow controls which prevent water being wasted. Electronic washroom control systems are also available with non-touch controls which promote increased levels of hygiene. Rada also offers pre-plumbed panels for group showering applications. Supplied ready to connect, these reduce installation times and are available with either mechanical or electronic timed flow controls.

PRODUCT DESCRIPTION

Ready to install slimline shower panel manufactured from a stain resistant acrylic resin stone, available in either silver or white finish. Single pipe entry for connection to a pre-blended supply, offering programmable shower times, automatic duty flushing and duty flush run times.

- Pre-plumbed shower panel with electronic timed flow control for connection to a pre-blended supply
- Panel powered by Hybrid Energy System - eliminating need for regular battery replacement (mains power not required), offering up to 10 years life
- Water & Energy Saving - Shower will automatically stop after pre-programmed time – prevents users leaving running
- BREEAM compliant flow rates
- Aids Legionella Control Compliance – Automatic Duty Flush can be selected to ensure water is not left standing in supply pipes
- Panel can be programmed to suit site preferences – Select from a choice of shower run times, duty flush intervals & duty flush run times
- Robust Construction – tri-laminate acrylic capped resin stone casing, resistant to water staining

RADA HAND WASHING

No matter whether the priority is safety, hygiene or infection control, Rada's comprehensive product range enables it to create bespoke hand washing solutions to suit the specific needs of many different applications.

The wide selection of taps includes electronic sensor spouts, integrated thermostatic taps, timed flow taps and even digitally programmable products - see 'Digital Washroom Controls' section. Each offers the ease of maintenance and cleaning, reliable performance and outstanding durability that you would expect from the Rada name.

Rada Timed Flow Taps	68 - 75
Rada Pulse Range	94 - 105
Rada Basin Spouts	81 - 83

PRODUCT DESCRIPTION

½" thermostatic mixing valve incorporating Radatherm service-free cartridge, check valves and strainers. Supplied with ½" flat faced union connectors terminating in 15 mm compression connections.

- Buildcert TMV3 Scheme Approved
- Suitable for 'under-basin' or duct installation
- Features the unique patented 'Radatherm' service-free cartridge
- Complete with check valves and strainers
- Tamperproof temperature setting (locked cap)
- Connections: (Inlets & Outlet) ½" flat-faced male union. Note: 2 elbows and 1 straight union connector are supplied, terminating in 15mm compression connections

PRODUCT DESCRIPTION

Non-touch basin tap with a temperature adjustment control (as a factory default). Battery operated 6V. Flow controller (6 l/min) enables low water consumption (0.51 l/instance of use).

- Non-touch activated basin tap
- 3-in-1 product: can be installed with pre-mixed supply, or with hot and cold supply - with or without temperature adjustment (non-thermostatic)
- Factory preset: no adjustments needed after installation
- Battery operated: no need for an electrician
- In-line filters and self cleaning diaphragm
- Commercial aerator/straightener - vandal resistant for longlasting use
- Connections: ½" BSP

RADA ELECTRONIC WASHROOM CONTROLS

The electronic washroom control range allows system designers to achieve outstanding performance while still meeting sustainability and water-saving goals.

Designed for commercial washroom applications they provide reliable water flow management for hand washing, showering and urinal flushing applications, all operated by non-touch sensors for increased levels of hygiene. The range includes everything from an individual outlet control through to a full 10-outlet system. These can be combined to suit any hand washing, showering and urinal flushing configuration and they are complemented by a full selection of ancillary products.

RADA UNIVERSAL TRANSFORMER

PRODUCT INFORMATION

PRODUCT CODE

Rada Universal 12 V AC Transformer
2.1.093.72.2

WEB LINK

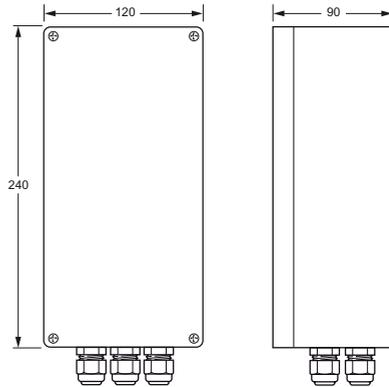

www.radacontrols.com/unitrans

PRODUCT DESCRIPTION

The Rada Universal 12 V AC Transformer is designed to supply 12 V AC to a maximum of 16 Rada Mono Control Systems. The transformer enclosure is water resistant and intended for wall mounting to a suitable flat dry surface. It is intended for permanent connection to the fixed electrical wiring of the mains electric system. A 2 metre length of 230 V supply cable is supplied pre-connected within the box. Safe, low-voltage 12 V AC output is fuse protected internally.

- Designed to provide safe, low voltage 12 V AC supply to up to 16 Rada Mono-Control Systems
- Fuse protected internally
- Supplied with 2 m length of pre-connected supply cable

RADA BATHING

Details on Rada's specialised solutions for bathing and showering applications are featured here.

These include an under-bath thermostatic mixing valve (with TMV3 approval for use in high-risk applications) plus other products which reflect Rada's technological capabilities such as a fully thermostatic and TMV3-approved bath and shower mixer. This section also features Rada's bath spout range for use with pre-blended water. These versatile products allow the creation of genuinely bespoke bathing and showering solutions.

WE KNOW YOU CARE

You've always put user safety at the heart of your business. Now you can support those standards beyond products with the UK's largest manufacturer-led Service Team.

Everything this team offers is designed to reduce risk and increase the safety of all your users. So whether you're in healthcare, leisure or education, you can be sure you're meeting your duty of care to provide safe water facilities for everyone.

We've innovated, engineered and manufactured all of our products ourselves. So it makes sense that our team is in the best position to service them – keeping your systems compliant and safe for everyone to use. We'll help you choose the best service package to safeguard the quality and performance of your systems, from commissioning through to the operational lifespan of your products. Here's what you can expect:

Full on-site services

Data recording

Safe and correct operation
of your installed products
and valves

Compliance reporting

Safety assurance

Fast response to
breakdown requests

Optional non-contract
maintenance
